

WORLD COLD CHAIN SYMPOSIUM

SAVE THE DATE • OCT. 21 • NAIROBI, KENYA

It takes more than one company, industry or country working on its own to succeed in expanding a sustainable cold chain and reducing food loss and waste. Success stories arise from solid collaborations and the development of sustainable business models. As a logical step building on previous World Cold Chain Symposiums, the theme for this year's event is *Sustainable Growth: Building Business Models for Cold Chain Development*.

Join the Global Food Cold Chain Council, the United Nations Environment Program's OzonAction, the Cool Coalition, Carrier and experts from around the world as we come together for an in-person and virtual event focused on the benefits of funding efficient and sustainable cold chain development programs and successes to date.
